To be sure of getting your plants while you are here we should have your order in advance of your coming so we can have them ready for you, as we may not be able to dig the stock while you are here.

Business Information

NOT OPEN ON SUNDAYS AND SATURDAYS.

THESE PRICES are in effect Fall 1965, Spring 1966.

ALL OUR STOCK is fresh dug for each order. None of it is in storage.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists, and dealers. Maryland customers are subject to 3% sales tax or send your License Number. All delivery costs are to be paid by purchaser.

PACKING. Boxes and bales will be charged costs of material and labor used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company. Claims not made within ten days cannot be honored.**

TERMS. Net, no discount or net 30 days from date of shipment to those of known responsibility **but must have satisfactory business references from others or remittance must accompany order.** Those desiring stock shipped C.O.D. will please remit **one-fourth** the amount of their purchase when ordering. Other terms by special arrangement. 1% per month interest will be charged if not paid when due.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express, motor truck, or parcel post. If by motor truck, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. **It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.** We cannot ship by railway freight.

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible. Of course, there is a regular season for shipping the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them. Risky shipping in hot summer.

Plan to Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Delaware, 100 miles from Chesapeake Bay bridge and tunnel via Norfolk, Va., 90 miles from Annapolis, Md., via Chesapeake Bay Bridge, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N.Y. We are on U.S. Route 50, 10 miles east of Salisbury, Maryland, on the Delmarva Eastern Shore.

Ornamental Stock

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate; 250 or more of a variety and size at the thousand rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

Items marked by an asterisk (*) are classed as Lining-Out stock.

Parrotia Persica

If one wants to make customers' eyes pop when they come to visit his autumn show garden, he should set the hamamelis cousin, Parrotia persica, before them. Eyes may pop even before fall rolls around, for the purplish flowers in dense heads come before the hamamelis-like leaves, giving a bizarre effect in spring. But its greatest glory comes when the leaves are touched by the cool weather of autumn and take on brilliant orange and scarlet tints, as well as one of the loveliest yellows found in leaf colors. It is a small tree, growing to 15 feet, of graceful habits, making it an ideal plant for the small garden. Best of all from the busy gardener's standpoint, it is easily satisfied in ordinary garden soil. Coming from northern Iran (Persia to us of the old school), it should be hardy in most parts of the country. See page 26.

Hamamelis Mollis. One of the best Witchhazels. See page 14.

ZENOBIA PULVERULENTA

For a lime-free, well-drained loamy soil this shrub does equally well in a light or shady position. The waxy, pure white bells are freely produced in June and July and are delightfully fragrant. It is a desirable, almost evergreen, plant and received a first class certificate. See page 37.

SARCOCOCCA HUMILIS

Its cheerful glossy green leaves intermixed in winter with almond scented flowers and later black berries. Not much over 18" tall, and ruscifola broader leaves and red fruits. See page 31.

YUCCA GLAUCA

Similar to Filamentosa. Foliage much narrower and more grasslike but stiff. Flowers on shorter stems and earlier than others. See page 37.

NEW BEAUTYBUSH

An uncommon deciduous shrub of great value is **Callicarpa bodinieri giraldi subincanensis**, growing six to eight feet high. As compared with other species of **Callicarpa**, the height of this variety is of great importance, for it gives better display to the unique distinctive blue berries during November and December, long after the foliage has fallen. But the leaves take on, in autumn, a bright rosy purple hue, harmonizing with the colored berries. It is a plant that thrives in any good garden soil. It is well teamed Bodinier Beautybush. See page 7.

CHINESE MAACKIA

Summer-flowering Tree

In the months of July and August, the Maackias are striking flowering trees. The white blooms are in dense, upright clustered racemes. Not a well known tree, it always arouses inquiries from visitors. Our species at this writing is **Maackia sinensis.** This is member of the Leguminose family, recognized by close examination of the little flowers. Introduced to cultivation in 1908, it is still not grown by many. Although not so well known as Amur Maackia, the density of its flowers gives it a distinct appeal. See page 24.

MAPLES

We like to refer you to our collection of Maples especially in lining-out sizes. We believe there will be a good demand for Maples in the future. You will notice many articles being published about them. This always creates a demand—especially when the article is good. We have tried to keep our prices reasonable. See pages 2 and 3.

BOXWOOD

Boxwood is another of our specialties and by growing it in the quantities we do, we are enabled to furnish it at these very low prices. This Boxwood is first-class in every way. We have customers who send us repeat orders several times during a season. We know you will like our Boxwood if you will let us send you some of it. **Good Stock, Good Service, and Low Prices.**

MAGNOLIA WILSONII

A deciduous shrub or small tree, **Magnolia Wilsonii** makes a striking picture in May and June with its large white, pendulous flowers and prominent rosy-purple stamens. The flowers are fragrant and this native of China gives of its best when planted in partial shade, where it will receive some protection from late frosts, which may spoil the splendid blooms. $1.00 each.

SOMETHING WE CANNOT CONTROL

During the summer months we are pleased for visitors to see our nurseries but during the digging season from September to July we **cannot** give callers the attention we would like. During the main digging season, if a customer takes the time of a foreman, it can mean that in his absence several helpers are idle and orders promised for the next few days cannot be handled. Therefore, we urge you to send your orders in to us several days in advance so we may have them ready for you.

AS GOOD AS CAN BE GROWN

We are exerting effort to produce the very best stock that can be grown, and in our fifty-nine years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

CYTISUS BATTANDIERI

A splendid tall shrub, perfectly hardy. The olive-green shot silver leaves are like a Laburnum and the flowers are in cone shaped clusters, which in summer have a scent of ravishing sweetness reminding one of pineapple. The upstanding racemes of bright golden-yellow pea flowers are indeed a beauty to behold.

Our 3-year seedlings bloomed this past season and we are very favorably impressed with it. We have been selling all we can grow and only have the following to offer this season: 3 yr. field clumps $2.00 each.

Dr. Ernest H. Wilson describes the Dove Tree in his book "Aristocrats of the Garden" as follows: "The distinctive beauty of the Davidia is in two snow-white connate bracts which subtend the flower proper. They are always unequal in size—the larger six inches long by three inches broad, and the smaller three and one half inches by two and one half inches; they range up to eight inches by four inches and five inches by three inches. At first greenish, they become pure white as the flower matures, the flowers and their attendant bracts are pendulous on fairly long stalks, and when stirred by the slightest breeze they resemble large butterflies or small doves hovering amongst the trees and are so freely borne that the tree from a distance, looks as if flecked with snow."

This is undoubtedly one of the most interesting trees grown. We have been unable to accumulate any sizeable stock, the interest being so great for it. Last season we sold over 400 with only the name and price in our price list. This season we have about 1000, probably again will not have enough. Our price is very reasonable considering the scarcity.

EDCO IRON

For experimental use in the control of chlorosis (lack of chlorophyl) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.

Prices: 1 lb. $2.30; 10 or more lbs. at $2.00 per lb.

THE RARE FRANKLINIA

Each twig develops at its tip a cluster of buds of graduated size, like over grown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerges four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. **There is a constant succession of blooms till hard frost.** We frequently get the unusual effect of a tree clad in crimson, autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston, Mass., and in Ohio.

We have found the Franklinia does much better if it has plenty of moisture at planting time.

HOLLY (Ilex)

For many years we have been urging nurserymen to grow more holly. Fifteen years ago there was not very much demand for holly. If you will refer to our catalogs about that time and since, you will find we said, "The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell."

Try to buy nice holly now, see how scarce it is. We find demand increasing each season.

FRAXINUS ORNUS

It is still quite uncommon, but it is well worth a place as a specimen tree. In leaf and growth much like the common ash, it yields large flossy panicles of white blossoms which are deliciously fragrant. See page 13.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Malathion.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

LILAC

SYRINGA JAMES MACFARLANE (NEW)

Introduced by the University of New Hampshire, it is a hybird of Syringa reflexa and S. villosa, blooming from 10 days to 2 weeks later than Syringa vulgaris types. James MacFarlane is a true pink in the Lilac family and grows to a height of about 8 ft. Its large trusses and rich color make it spectacular and even small plants bloom freely. It is extremely hardy and adaptable, withstanding moisture conditions fatal to vulgaris hybrids.

SYRINGA PALIBINIANA

This dwarf lilac from Korea must surely rank as one of the finest deciduous rock garden shrubs to come to us from the Far East.

Syringa palibiniana has much to commend it. Given a light, leafy soil with good drainage and a sunny position it will thrive and take many years to reach an ultimate height of about 3 ft. The sweetly-scented, pale mauve sprays are produced abundantly in late spring, and it makes an ideal shrub for pot cultivation in the alpine house.

In spite of such virtues, S. palibiniana is still a comparative rarity in gardens.

SYRINGA MICROPHYLLA SUPERBA

A new variety of Syringa microphylla named superba, is said to flower again in early Fall, but primarily it is Spring-flowering. The flowers have the same fragrance as the Daphine, which gives it the popular name Daphne Lilac.

Syringa microphylla, itself, is distinctive for its very small leaves, less than an inch in length, and quite orbicular. The species is called Littleleaf Lilac. This is a small shrub, 4 to 5 feet in height. The plant is graceful, with slender stems. The flowers are in loose trusses, with main ones at the top of stems, and smaller ones along the branches. The entire plant in flower is like a huge bouquet, pleasing and novel. They bloom a little later than the popular hybrids, at the end of May, or in June, and are highly rated by the authorities. Red in the bud, they open soft pink, and bloom freely. This is a new hybrid, and not yet found in many nurseries.

SYRINGA VELUTINA KOMAR Miss Kim

Syringa velutina Komar 'Miss Kim'—A seedling selection made by University of New Hampshire, from seed collected at peak of Paik Un Dae, Pouk Han Mountains, north of Seoul, Korea in 1947. The original plant of 'Miss Kim' has maintained a height not exceeding 4½ ft. in New Hampshire. Flowering late, it escapes frost damage. Flowers lavender, fragrant. Fall foliage burgundy-red. Hardy to at least −25° F.

AUNT MARY'S SWEET CORN

The Sweet Corn Supreme

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for $1.00, postpaid.

$2.00 per pound, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

This nursery was started just 60 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow azaleas.

Many items in this catalog will undoubtedly be sold out before the season is over. We suggest you place your order as early as possible.

MALUS — FLOWERING CRABS

The Flowering Crabs are among the most charming of spring trees. They are not only beautiful when in blossom but many carry most ornamental and richly-colored fruit in the autumn. Most of the Crab family form graceful garden trees of medium size. They are quite hardy and require no particular cultivation, thriving best in a good loam and full sunshine.

SYRINGA PALIBINIANA

This dwarf lilac from Korea must surely rank as one of the finest deciduous rock garden shrubs to come to us from the Far East.

Syringa palibiniana has much to commend it. Given a light, leafy soil with good drainage and a sunny position it will thrive and take many years to reach an ultimate height of about 3 ft. The sweetly-scented, pale mauve sprays are produced abundantly in late spring, and it makes an ideal shrub for pot cultivation in the alpine house.

In spite of such virtues, S. palibiniana is still a comparative rarity in gardens.

1 yr. grafted plants	$1.00	$7.50	$65.00	

This nursery was started just 60 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

The demand for good holly is growing every year. Be prepared. Good holly is still scarce.

MAPLES

We like to refer you to our collection of Maples especially in lining-out sizes. We believe there will be a good demand for Maples in the future. You will notice many articles being published about them. This always creates a demand—especially when the article is good. We have tried to keep our prices reasonable. See pages 2 and 3.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow azaleas.

CORNUS KOUSA CHINENSIS. Vigorous grower, larger long lasting flower bracts than Kousa, turning pink when fading.

EDCO IRON

For experimental use in the control of chlorosis (lack of chlorophyl) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.

Prices: 1 lb. $2.30: 10 or more lbs. at $2.00 per lb.

See page 54 for Azalea rooted cuttings.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Malathion.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

This nursery was started just 60 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

TAXUS (Yew)

The Taxus are undoubtedly the most popular and useful of all the ornamental evergreens. We have been growing them extensively a good many years and the demand keeps increasing.

We honestly believe you will do well to plant and grow on some of these Yews.

Baccata hibernica (Irish Yew). A strictly fastigiate form, with stout crowded upright branchlets; leaves radially arranged around the branches, dark glossy green, more obtuse than in the type. One of the most desirable evergreens of columnar habit for formal gardens. Do not recommend planting north of Philadelphia.

* 6 to 8 in. trans.		$3.00	$20.00
* 8 to 10 in. trans.		3.50	25.00

Baccata repandens (Spreading English Yew). A low form with wide spreading branches and dull bluish green, narrower and longer leaves, partly falcately curved upward. Hardy in New England and one of the best spreading types. Nobody seems to have enough of these the past few years.

4 to 6 in. trans.		$3.00	$25.00
* 2¼ in. pot plants 2 yr.		3.50	30.00

Chinensis (Chinese Yew). Very handsome with its large rich light green leaves. Branches spreading. Attractive.

* 4 to 6 in. trans.		$3.00	$25.00

Cuspidata (Spreading Japanese Yew). For any and every purpose in which evergreens are required the Japanese Yew can be recommended. Immune from most diseases and pests. Withstands shade or full sunshine. Dark green at all seasons of the year. Grows broader than tall.

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties. Many new varieties are in this list.

	Each	10	100	1000

Cuspidata nana Grandifolia. Practically identical with Cuspidata Nana but grows much larger and two or three times faster. Particularly desirable.

24 to 30 in. B&B	$6.00	$55.00	

Cuspidata nana pyramidalis Hilli. An erect-growing type of the Dwarf Yew. Medium fast grower and very useful. Also noted for its fruiting qualities.

* 8 to 10 in. trans.		$3.50	$30.00
24 to 30 in. B&B	$6.00	50.00	

Cuspidata Viridis. A cuspidata type. Very compact growing dark green foliage, needles wide. This is a new one and looks very good to us.

Media Helleri. One from the New England states highly recommended.

*12 to 15 in. trans.		$4.50	$35.00

Media Henryi. An erect grower in form similar to Erecta.

24 to 30 in. B&B	$5.00	$45.00	
30 to 36 in. B&B	6.00	50.00	
36 to 42 in. B&B	7.50		

Media Hicksi (Hick's Yew). A distinctly columnar form with upright branches and radially spreading leaves. Another good substitute for the Irish Yew where that variety is not hardy. The demand is strong for this variety. Hardy at Boston. Always in great demand.

* 4 to 6 in. trans.		$2.50	$20.00
*12 to 15 in. trans.		3.50	30.00

Media Hunnewelliana. A natural cross between the Japanese and American Yews. An intermediate between the parents in habit of growth, color of foliage and in general appearance. Hardy, but in winter the clear green of its foliage is masked by a yellowish-bronze pigment.

15 to 18 in. B&B	$3.50	$30.00	

This may save you a trip. Don't take a chance but contact us before coming or sending for a load unless your order has previously been received and acknowledged for a certain date.

Ilex Creanata Helleri is one of the very good sellers now. Is a dwarf, slow growing, very compact for small places. Looks good all the time.

	Each	10	100	1000
Media Kelseyi. Begins bearing berries even on small plants. Fairly slow grower; dark green, dense needles of the Nana type. Upright bush. Larger sizes literally infested with bright red fruits. We never grow enough to supply the demand. This and Jeffrey's Pyramidal are very similar.				
* 4 to 6 in. trans.		$2.50	$17.50

Media Mioun. This is a selection from Adams Columnaris but instead of growing upright they have a spreading habit similar to Andersoni. Rapid grower.				
*12 to 15 in. trans.		$4.50	$35.00	$300.00
Media Moon's Columnaris. A broad columnar form. Good green foliage. One of the hardier ones.				
*10 to 12 in. trans.		$4.00	$35.00	
Media ovata. Broad, upright in habit, large dark leaf and is unusually attractive throughout the year. Heavy fruiter.				
*12 to 15 in. trans.		$4.50	$35.00	$300.00
Media Taunton. A low growing heavy, dark green foliaged Yew. This is an unusual type in that its branches start out horizontally and then make an upward growth. We found this growing in Massachusetts and consider it distinct from all other Yews we are growing. Stock very limited. Always a good demand for this one.				
* 4 to 6 in. trans.		$2.50	$20.00	
*10 to 12 in. trans.		4.00	30.00	
Media Thayeri. A low-growing type. Has good color foliage. One of the really good ones. Similar to Andersoni.

Media Wardi. A selection of the intermedia types growing into a low spreading, very compact plant. Similar to the regular Media variety but foliage is a little finer.				
*12 to 15 in. trans.		$4.50	$35.00	
Media Wellesleyana. Another form of Media making a dense, broad column. Foliage a fine dark lustrous color.				
*12 to 15 in. trans.		$4.50	$35.00	

MORE HATFIELD YEWS

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. We are giving brief descriptions.

Media Hatfield No. 2. Real dark foliage, upright grower; very dense; needles medium length. Very good.				
*10 to 12 in. trans.		$3.50	$30.00	
12 to 15 in. trans.		4.00	35.00	
Hatfield No. 6. Somewhat like No. 8 in growth but twigs are not as heavy; leaves narrow. Very graceful.				
* 4 to 6 in. trans.		$2.50	$20.00	
*12 to 15 in. trans.		4.00	35.00	
15 to 18 in. B&B	$3.50			
18 to 24 in. B&B	4.00			
12 to 15 in. trans.	3.00	25.00		
Hatfield No. 7. Bright glossy green, heavy foliage; long needles. A low growing spreading type. Berry bearing. This one sells itself when seen.				
*10 to 12 in. trans.		$4.00	$30.00	$250.00
*12 to 15 in. trans.		4.50	35.00	300.00

24 to 30 in. B&B	5.00	45.00		
30 to 36 in. B&B	5.00	50.00		
Hatfield No. 8. Slow growing; very compact. Foliage bright green. Resembling Cuspidata Nana. Heavy fruiting type.				
*10 to 12 in. trans.		$3.50	$30.00	
*12 to 15 in. trans.		4.00	35.00	
12 to 15 in. B&B	$3.00	25.00		
15 to 18 in. B&B	3.50	30.00		
30 to 36 in. B&B	6.00			
Hatfield No. 18. Similar in growth to **Taxus cuspidata.** Foliage a shade lighter making it wonderfully attractive. Probably the most rapid grower of all the low types of Taxus. However, it can be kept compact with a little shearing. If you want a good, quick grower, yet one having the good qualities of Cuspidata.				
* 4 to 6 in. trans.		$2.50	$20.00	
*10 to 12 in. trans.		3.50	30.00	
12 to 15 in. trans.		4.00	35.00	
Hatfield No. 23. Short, fine slender foliage. Spreading type. Slow growing.				
12 to 15 in. trans.		$4.00	$35.00	

TINGLE'S YEW SELECTIONS

The following five varieties of yews are our own selections and we believe you will find they are very good.

Media T 31. A new one of our own selection. Grows in semi-globe shape. Complete, good color, grows fairly rapid. This has attracted much attention here.

	Each	10	100	1000
*12 to 15 in. trans.		$4.50	$35.00	$300.00

Media T 33. Slender, upright grower. Foliage dark green. Useful in narrow spaces. One of our selection.

AZALEAS

Sizes of azaleas are as follows: 2 in. pot plants are a rooted cutting grown in the pot one season, 2 yr. size grown one year in pot and one year in field beds, 3 yr. size have been grown in pot one year and field beds two years and 4 yr. size grown in pot one year and field bed three years.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season, the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

Items marked by an asterisk (*) are classed as Lining-Out stock.

Claims, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate; 250 or more of a variety and size at the thousand rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

Items marked by an asterisk (*) are classed as Lining-Out stock.

S. following size signifies Seedling.

Cornus Kousa Churensis is surely a beauty.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania has spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range than then available. He has had wonderful success and is now recognized as the leader in this field.

As to hardiness: these varieties will average hardier than Hinodegiri and Amoena and much hardier than the other Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the past few winters with only negligible injury to a few. Most of them were uninjured.

A deciduous shrub or small tree. **Magnolia Wilsonii** makes a striking picture in May and June with its large white, pendulous flowers and prominent rosy-purple stamens. The flowers are fragrant and this native of China gives of its best when planted in partial shade, where it will receive some protection from late frosts, which may spoil the splendid blooms. We have not had enough to supply the demand the past two seasons. Better order early. $1.00 each.

ODD CHINESE QUINCE

The most striking thing about the Chinese flowering quince is its huge fruit, in comparison with the Japanese quince whose small, irregular, pocket-size fruit is familiar to all. Its flowers and fruit are not abundant on individual plants and the small tree is not especially ornamental. But, no one grows it much. Let us believe, however, that to see the plant with its occasional large fruit is rather thrilling. It may be a solitary specimen that seems somehow misplaced, hung on the plant as an ornament. Its leaves are larger than those of the familiar Japanese species, the occasional flowers are light pink and the lonely fruits about 6 inches. As a real oddity, every nurseryman should have it on his grounds. It can be a reminder of the delicious fragrance of the smaller fruit of the Japanese quince. This Chinese fruit resembles that of a large pear.

Be sure to read page 1 carefully before ordering.

Many items in this catalog will undoubtedly be sold out before the season is over. We suggest you place your order as early as possible.

SATSUKI HYBRID AZALEAS

We are not sure of the parentage or classification of these Azaleas. Mostly Japanese names and it is easy to misspell them by sound. Will appreciate it if you can help us make the corrections. Many of these varieties we only have a few of, some we have in hundred lots or more. We are still trying to get descriptions of the varieties we are not describing and hope to have it in a future issue. Besides the ones we are offering we have many others in small quantities we are still testing for hardiness and desirability.

A new group from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge. These need more and wider trial before we can recommend planting in exposed or colder sections.

The following descriptions were furnished us by The Chugai Nursery Company.

BELTSVILLE AZALEAS

Here is a group of Azaleas originated at the Plant Industry Station of the U.S. Department of Agriculture at Beltsville, Md. These are mostly good greenhouse flowering varieties as well as being hardy in colder sections. The descriptions of the named varieties are from descriptions furnished by the U.S. Department of Agriculture.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybirds—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the New Gable varieties.

DEERFIELD AZALEAS

The following Azaleas were bred with the hope of getting hardier evergreen types. While we do not know how hardy they really are, we are offering them for your own testing.

FRIGID. White flowers. Very free flowering.			
12 to 15 in. B&B	$2.00	$17.50	$150.00
IVORY. White. Flowers freely.			
12 to 15 in. B&B	$2.00	$17.50	$150.00
NOME (Double Hinomayo). Hardy. Medium size. Pink.			
* 2 in. pot plants		$2.00	$17.50
* 2 yr. field beds XX trans.		3.50	30.00
* 3 yr. field beds XX trans.		5.00	40.00
* 4 yr. field beds XX trans.		6.00	50.00
8 to 10 in. B&B	$1.50	12.50	
10 to 12 in. B&B	2.00	17.50	

See page 54 for Azalea rooted cuttings.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Malathion.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

U.S.D.A. AZALEAS

Some years ago the U.S. Dept. of Agriculture introduced a collection of Azaleas mostly from Japan. We have been growing these Azaleas many years and have selected the following varieties as the best ones in this collection. They are well worth trying.

BENI KIRISHIMA. Old rose, semi-double.

	Each	10	100	1000
* 2 in. pot plants		$2.00	$15.00	
* 2 yr. field beds XX trans.		3.50	27.50	
* 3 yr. field beds XX trans.		5.00	40.00	

NEW U.S.D.A. AZALEAS

The Crops Research Division of the Agricultural Research Service, U. S. Department of Agriculture, hereby releases five azaleas. These varieties were developed by B. Y. Morrison and J. L. Creech at the U. S. Plant Introduction Station, Glenn Dale, Maryland, from a series of crosses made in 1947 and designed to incorporate some of the flower qualities of the Belgian-type azaleas into the hardy Glenn Dale hybrids.

After widespread trials of 96 selections, the azaleas being released at this time are considered to be the most promising for the azalea-growing areas of southeastern United States, from Washington, D. C., to Louisiana, and for forcing in all areas.

Their significant characteristic is in the pastel coloring of the flowers and the heavy texture of the petals. Occasionally the white selections are flecked and striped with red or purple, and some flowers show an irregular degree of doubleness. They flower in the Washington, D. C., area about May 8 to 15. These are suggested for further trial.

BAYOU (PI 279405). A spreading azalea with leaves narrow elliptic, slightly hairy, dark green. Flowers 2½" across, single but with occasional petaloid stamens, white with occasional scarlet flakes and stripes.				
* 2¼ in. pot plants		$5.00	$40.00	
4 in. pot plants	$1.25	10.00		
GREEN MIST (PI 279406). A somewhat upright azalea with leaves glossy, narrow elliptic, glabrous. Flowers 2½" across, single, white with a distinct greenish blotch, heavy texture to the flowers. We have found this the hardier of this set.				
* 2¼ in. pot plants		$3.50	$25.00	
4 in. pot plants	$1.00	7.50	60.00	
* 3 yr. field beds XX trans.		6.00	50.00	
PINK ICE (PI 279408). A broad spreading azalea, with leaves dull green, large rather obovate, glabrous. Flowers 3" across, double, mallow purple with occasional purple flakes, smooth margins and crisp texture.				
* 2¼ in. pot plants		$3.50	$25.00	
4 in. pot plants	$1.00	7.50		
WHITEHOUSE (PI 279409). A broad spreading azalea with leaves large, dull green, somewhat obovate, slightly hairy. Flowers 3¾" across, single, white with roundish petals with somewhat wavy margins and overlapping.				
* 2¼ in. pot plants		$5.00		
4 in. pot plants	$1.25	10.00		

VUYKIANA AZALEAS

A new race of large flowered Japanese Azaleas, produced by crossing hardy Azalea Malvatica hybrids with Azalea Mollis. Sturdy growers, prolific bloomers. From the information we have they are much hardier than the Kurume Azaleas. Flowers range from 2 to 2½ inches. All bloom late mid-season. Plants grow tall.

	Each	10	100	1000
BEETHOVEN. Large mauve.				
* 2 yr. field beds XX trans.		$3.50	$27.50	
JOSEPH HAYDEN				
* 2 yr. field beds XX trans.		$3.50	$27.50	
PALESTRINA. We are recommending this to use in place of Ledifolia Alba for a tall growing whitebloomer. Last season when Ledifolia Alba were both bud and bloom killed, Palestrina came through without any wood damage and plenty of white flowers. Try it for a hardier tall white.

THE RARE FRANKLINIA

Here is a plant that just keeps growing in popularity. To see the bloom and fall foliage makes one want it in his own garden. This is one of our very best sellers. Good for bloom and foliage effect. See page 13.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Malathion.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

BACK ACRE AZALEAS

By Morrison

These azaleas are the first of the seedlings grown on personally, with a breeding program that is an extension of one phase of the original Glenn Dale work. They are **not** Glenn Dales, but are more closely related to the Satsuki group from Japan.

The breeding program centered and still centers on the production of double flowers that will be hardy for outside work, and in as wide a range of kinds that have white or nearly white centers and colored margins. The doubles are represented in this offering but only a few of those to come. The white or light centered kinds are a mere sample of the range to be available shortly.

These kinds are from parents that are perfectly cold hardy in Washington, D.C. and plants have been tesed safely in that area, in Memphis, Tenn., and in the general Atlanta area. In extremely cold winters there was some loss of flower buds.

The usual variation in degree of doubling may be expected on newly set plants, and the variations in light centers will vary considerably until the plants are old enough to have many, small, blooming shoots.

Although they are all happy in the South, they are **not** bred primarily for southern gardens.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

BOURDON. Early flowering, double, purple, semi-evergreen to evergreen. Some tendency to autumn bloom. 2 yr., 3 yr.

CAYENNE. Early flowering, double. Rose Doree, the unopened buds almost carmine. Semi-evergreen to evergreen. 2 yr., 3 yr.

CORA BRANDT. This is the best double for form, almost like a Belgian frilled on edges; Scarlet Red. Very late. A ten year old plant about 30 in. tall, has as much spread. 2 yr., 3 yr.

CORINNE MURRAH. White eye, edged with pale rose pink, very flat flower, and usually stable in having the eye. 2 yr., 3 yr.

DEBONAIR. Flowers usually about 2 inches. White flushed with La France Pink from the edges inward. A very few dots on the upper lobe. 2 yr.

ELISE NORFLEET. Flowers pinkish double 2 to 2½ inches with white center edged with a hue between Rose Doree and Scarlet. 2 yr., 3 yr.

ENCORE. Late flowering, double. Large flowers. Rose color brilliant as if an undertone of yellow. Scattered autumn bloom. 2 yr., 3 yr.

FRIENDSHIP. Evergreen. Midseason to late midseason. Single. Rose color. Dots a little darker showing an intensification color. Striking in mass. 2 yr., 3 yr.

HEARTHGLOW. Evergreen. Late flowering, double 3 to 3½ in. Rose Doree flowers flushed from center with scarlet. 2 yr., 3 yr.

HEIRLOOM. Single 3 in. flowers between Tyrian pink and Mallow purple. Rhodamine purple on colored margins. Late midseason. Evergreen. 2 yr., 3 yr.

KEEPSAKE. Evergreen. Midseason to late. Single. Variable white star at base. Margin between pink and purple. Dots in blotch are showy, brownish on white ground. 2 yr., 3 yr.

MARGARET DOUGLAS. 2 to 2½ in. flowers. La France centers, margins Rose Doree. Some dots in the blotch area of Tyrian Rose. Some flowers will be selfs. 2 yr., 3 yr.

MAY BLAINE. Evergreen. Late flowering double 2½ to 3 inches. Well imbricated in form like a formal Camellia. Carries in the garden effect as a light lavender. 2 yr.

MARIAN LEE. 2½ inch flowers. Pale rose pink center edged with nopal red with white eyes. The flower is flatter than some. 2 yr., 3 yr.

MALAGUENA. Early flowering double. Begonia rose flushed with Rose Doree, dots on upper petals Tyrian rose. Semi-evergreen to evergreen. Some autumn bloom. Garden effect a brilliant coral pink. 2 yr., 3 yr.

MISS JANE. Evergreen, late flowering, double. Center of flowers irregularly near white; border pink. Grows as broad as tall. 2 yr. Add 50 cents each to above prices.

These Back Acre Azaleas by Morrison are creating much interest in the new Azaleas now.

MISTY PLUM. Evergreen; late midseason; single. Margins purple, irregular white center with dots of purple on the white. Large. 2 yr., 3 yr.

MORESCA. Early flowering double. Amaranth pink upper petals shaded lighter, dots rose. Garden effect purplish rose. Semi-evergreen. Leaves lighter than most. 2 yr., 3 yr.

PAT KRAFT. Dr. Morrison says "this is a honey." Very large 2½ to 3 inches dark red. Very late, dark foliage. A 10-year old plant now not over 2½ feet tall. 2 yr.

RACHEL CUNNINGHAM. An early flowering double that carries in garden effect as light scarlet. The Rideaway colors are Rose Doree deepening to scarlet red. 17 to 20 petals, forming a pompom shaped flower. The foliage is rather a light yellow-green and is a little more than semi-evergreen. The mother plant now over ten years old shows a height of 4 feet with a broad spreading habit. 2 yr. Add 25 cents to above prices for each plant.

SAINT JAMES. Three inch flowers. Rose Doree which carries as a salmon pink. When the plants are mature they usually come with a starry white center. 2 yr., 3 yr.

STARFIRE. Early flowering double. Geranium pink, dots on upper lobes rose. Garden effect bright coral pink. Evergreen to semi-evergreen. Leaves narrow to light green. 2 yr. Add 50 cents each to above prices.

STORMCLOUD. Evergreen; late flowering. Mallow purple with a blotch of aster purple dots. 10 yr. plant about 4 ft. and as broad as tall. 2 yr.

TARGET. About 2 to 3 inches across. Single, pure red with small rounded dark green foliage. 2 yr., 3 yr.

THARON PERKINS. 2½ to 2¾ inch flowers. Early. Geranium-Pink dotted with Tyrian Rose. Maximum height probably 3 ft. 2 yr.

WHITEJADE. 2 in. flowers smooth edges, pure white, green in center. This is a superb white. 2 yr., 3 yr.

FELDYK AZALEAS

From a famous grower in Holland. Introduced as "the Sweet Pea colored strain." They are crosses between Malvatica and Kaempferi and Japanese Azaleas. Have large bright colored flowers. Force easily, strong growers and very hardy. The blossoms exhibit all the delightful colors we most associate with Sweet Peas. One of the hardest evergreen types we grow.

GLENN DALE AZALEAS

We began growing these Glenn Dale Azaleas in 1941. During the past few years, since they are becoming better known, the demand has increased rapidly. Most all the reports we get from the growers are very enthusiastic. They are doing well in some sections where the evergreen varieties were not supposed to grow.

Many who have seen our fields of these Glenn Dale Azaleas in bloom expressed their amazement and joy at their size, coloring and quantity of bloom. You folks who have been dealing with us for the past many years know we do not recommend a plant unless we really believe in it. We do suggest you try some of these Glenn Dale varieties if you can grow any of the other evergreen azaleas and while you may have some disappointments we feel sure you will be greatly pleased with their growth and beauty.

These one-like descriptions do not tell you much but we do have a special booklet that describes them much more fully. Sent on request—no charge.

Sometimes when Azalea flowers are described as striped or flaked on white they will appear as a solid color. When this occurs the branch should be cut out. This seems inherent with the variety—not any fault of the nurseryman.

Prices of Glenn Dale Azaleas

		Each	10	100
B	2 in pot plants		$2.50	$20.00
C	2 yr. field beds XX trans.		4.00	32.50
D	3 yr. field beds XX trans.		6.00	45.00
E	4 yr. field beds XX trans.		7.00	55.00
F	6 to 8 in. B&B	$1.25	10.00	85.00
G	8 to 10 in. B&B	1.50	12.50	100.00
H	10 to 12 in. B&B	1.75	15.00	125.00

K	18 to 24 in. B&B	4.00	37.50	350.00
L	24 to 30 in. B&B	5.00	45.00	
M	30 to 36 in. B&B	6.00	55.00	

Capital Letters after variety name indicate sizes available in that variety as capital B means 2 in. pot plant size, capital C means 2 yr. field beds XX trans., and so-on. We hope you will understand this system of indicating sizes as it saves a lot of space in catalog. We have been using this system for Crabapples several years and it seems to be working fine.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

ABELIOPHYLLUM. Often called white Forsythia. Pale pink buds opening to white, bell shaped, fragrant flowers in early spring.
ACER PSEUDOPLATANUS PURPUREUM. One of the finest fast growing, pictorial trees. The wing seeds, bright red from July on.
AESCULUS PAVIS RUBRA. Is very beautiful slow growing. The rich crimson flowers are produced during June in panicles up to 6 in. long.
AMELANCHIER LAEVIS. A picture of striking beauty in early May when the profusion of white flowers intersperced with delicate pink young foliage. The leaves assume rich autumn tints.
ARCTOSTAPHYLOS UVA URSI. An evergreen creeping plant having small white flowers, tinged pink, followed with red berries.
CORNUS KOUSA CHINENSIS. Vigorous grower, larger long lasting flower bracts than Kousa, turning pink when fading.
CORNUS KOUSA. Upright tree when young, broadening gracefully with age. White flowers about a month later than Cornus Florida, followed by large strawberry shaped red fruit.
COTONEASTER HORIZONTALIS. This dwarf horizontal branched species is ideal for covering unsightly areas, banks and backs of rock gardens, etc. The beautifully colored, long persistent leaves and red berries are extraordinarily attractive in autumn.
CORYLOPSIS PAUCIFLORA. Dwarf shrub. Great masses of scented primrose yellow flowers literally cover the plant in April.
CORYLOPSIS PLATAPETALA. Deciduous with large yellow flowers in hanging clusters.
CYDONIA SINENSIS. A small spineless tree, semi evergreen, flowers pale carmine. Fruits up to 7 in. long, pale lemon yellow.
CYRILLA. Late summer flowering with slender racemes of attractive white flowers. Leaves in autumn are highly colored.
CORYLOPSIS SINENSIS. Very neat shrub with waxy yellow fragrant flowers in long pendulous racemes in early spring.
CRATAEGUS WINTER KING. Silver barked young trees, spreading upright. Bear clusters of large orange-red fruits when young. Stay on most all winter. Rust resistant glossy foliage .
HAMAMELIS JAPONICA RUBY GLOW. Probably the best red flowering witchhazel. Bronzy red flowers in January and February.
HAMAMELIS MOLLIS BREVIPETALA. New large fragrant orange yellow flowers in February. Blossomed well winter 1962-1963 at Morris Arboretum, Philadelphia, Pa.
HALIMODENDRON HALODENDRON. A handsome grey foliaged shrub about 6 ft. small pinking pea-like flowers during June and July. A useful drought resister for poor soils and seaside planting.
MAACKIA CHINENSIS. Small deciduous tree with feathery leaves of silky appearance. Flowers pale yellow in terminal racemes.
OXYDENDRON ARBOREUM. Beautiful late blooming shrub or small tree, white flowers in slender racemes. Foliage assumes exquisite crimson shades in autumn. Need acid soil.
PARROTIA PERSICA. Perhaps there is no more effective tree than this Persian species, splendent in its crimson and gold autumn tints.

EVERGREENS AND FLOWERING SHRUBS FOR THE HOME

Katherine M-P. Cloud. $4.95 postpaid.

This is the book for the small home owner who wants to landscape his grounds attractively without too much burden. Also valuable to the landscaper in planting small places.

EVERGREEN FOR EVERY STATE

Katherine M-P. Cloud. $4.95 postpaid.

An easy to follow, non-technical, authoritative guide to the effective use and practical care of evergreen plant material. Among the items stressed are propagation and growing of such favorites as azalea, boxwood, camellias, hemlocks, hollies, junipers, rhododendrons and yews.

MANUAL OF CULTIVATED TREES AND SHRUBS

Alfred Rehder. $13.95.

This standard reference will be welcomed by all who are interested in the cultivated trees and shrubs hardy in North America. It presents a systematic and descriptive enumeration of 2,550 species and their many varieties. Identification is facilitated by analytical keys. An exact description of each tree is given together with brief notes on its economic and ornamental properties. A glossary, complete index of author's names and a map showing zones of hardiness are also included. Map; 996 pages; 5⅞ x 8¾ inches.

AUNT MARY'S SWEET CORN

The Sweet Corn Supreme

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for $1.00, postpaid.

$2.00 per pound, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

This nursery was started just 60 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

RHODODENDRONS OF THE WORLD
And How to Grow Them

by David G. Leach

Comprehensive volume (azaleas not included) presents information on landscape uses, cultivation, propagation, pest control, hardiness, greenhouse care and breeding. Full data on species and varieties, including origin, classification, rating, height, color and season of bloom. 544 pages and large ones too.

$25.00, postpaid

Seems like a lot of money for a book but it must have taken almost a fortune in time and money to gather all the information it contains. If you do not know much about Rhododendrons it will tell you about all you need to know. If you are an expert on them it will tell you more.
